.....

Cybernaut travelling the universe on frequencies of sound and rainbows of light. My influences the colours i see and the tones i hear.

my music a blend of ambient soundscapes, ever evolving grooves, and experimental electronica with an emphasis on free-form improvisation.

the sound that i create can cause multi-dimensional audio images to form within the mind that evoke interstellar exploration, submarine voyages to the center of the earth, journey's to brazil and surrealistic dream worlds that are hidden deep within the darkest recesses of the mind.
